## Cadets Entertain In Grand Style

Last Wednesday night the Gleichen Cadet Corp put on a very interesting evening at a Community Hall with their commanding officer Capt. Jones in charge of affairs.

The evening entertainment included three very interesting reels of moving pictures and a demon-tration of what Cadets do when they go for their weekly drills.

The first demonstration on the program was an example of what the commanding officer has to contend with when he starts drilling a bunch of rookies. The act which lasted about ten or fifteen minutes really brought the crowd down with laughter. Later in the program the same troop showed that the benefit of their drill had to be almost at perfection.

Other demon-trations were those of what games they play to make real wrestling matches of the boys in the cadet.

A wrestling match was put on with Dusty Plett against L. Bessas which really was a thriller. Donny Brown acted as referee and just about got the worst of it.

Two of the young Indian boys put on a round boxing match that really was a thriller and then Jimmy Brown and Denny Bessas put on boxing match that brought lots of laughs. Rev. Mr. Cole presented a series of medals to David Murray and Water-chieft for marksmanship and in his speech stressed the point of what good this cadet organization was doing for the youth of our community. It has been my observation cemented a friendship and comradeship between the Indian boys and the town boys which is very necessary in building a good community.

At the conclusion of the program a lovely lunch was served by the parents of some of the members. The only regrettable feature of the program was the poor support of the parents of the 6 Cadets only 14 parents were in attendance and the house should have been packed. Yes it was free—Your Reporter.

Winnipeg, Manitoba.

Humus—The Liblood of the Soil

Humus, often referred to as soil organic matter, is universally recognized by agricultural scientists as the most important of all soil constituents. It is the liblood of the soil or, as the English farmer would say, "The heart of the land."

What is Humus? Humus is actually the end product of the organic matter that is put into the soil. By the organic matter is meant materials built up by plants and animals. For instance, stubble, straw, leaves, grain, clover, manure, etc., are organic materials, or organic matter. When these materials are completely rot-tened or decayed they form a dark brown or black, more or less sticky substance which is "Humus."

Benefits of Humus. One of the most important functions of humus is to gradually liberate a continuous stream of nutrients or foods for plant growth. Because of its sticky physical condition or structure of soils, provides better aeration; increases the water-holding capacity of the soil; has a binding effect on the soil particles, thus preventing soil erosion; helps the soil to absorb more heat; stimulates the growth of beneficial soil microorganisms; and prevents chemical changes taking place too rapidly in the soil.

Humus Needed. There is, of course, a direct relationship between the type of crop rotation practised in the Prairie Provinces and the percentage of organic matter in the soil. A short rotation such as a two-year, fallow-wheat rotation is highly detrimental to the building up of soil organic matter. No for-mer has been found for wheat and cereal crops every year, or every other year on a field, and at the same time, maintaining soil organic matter? Let there be no mistake about it: the use of fallow, wheat, or cereal rotation, which include grains and legumes, provides the only completely satisfactory answer to the vital problem of maintaining the fertility of our prairie soils.

A tagged rainbow trout was caught recently in Lake Michigan, and it had travelled 400 miles in six months.

Yes, sir, that's Granville, the sweet old thing with the poisoned claws who turns up occasionally on the Rawhide Show. Of course she does look a bit like CBC staff announcer Max Ferguson but Rawhide, who says he's played with the re-embalance, claims this was just an optical illusion.

## W. A. Can. Legon Elect Officers

The Women's Auxiliary to the Canadian Legion held their regular meeting in the Legion Hall last Thursday evening with some 20 ladies present. Mrs. Mackin and Mrs. M. Murray applications to join the Auxiliary were accepted.

Thank you letters were read from veterans at Eventide Home and from men on active service who received their food parcels at Christmas time.

Final arrangements for the Annual Show of the agenda was held on February 1st was completed.

Next on the agenda was the election of officers. H. Bogie, president of the men's branch, conducted and installed the following officers:

President—Mrs. H. Bogie.  
Vice-President—Mrs. J. Bell and Mrs. G. Evans.  
Secretary—Mrs. R. Oliver.  
Treasurer—Mrs. A. N. McLeay.  
Executive council—Mrs. W. Schell, Mrs. M. Holt; Mrs. R. J. Burne, Esq.; Mrs. J. C. Kileup; Mrs. F. Michael and Mrs. H. Vardell.  
Auditor—Mrs. G. W. Evans.

After officers were installed the president, Mrs. Bogie, took the chair. She thanked Comrade Bogie for his assistance. Questions were asked and Mr. Bogie answered them.

The president then appointed the following: Standard bearer Mrs. Anderson, Sick committee—Mrs. S. Hampton, and Mrs. R. N. Ridell.  
Sergeant-at-Arms—Mrs. G. Bogie.

Entertainment—Mrs. A. Murray, Mrs. R. Burne and Mrs. Jones.

After much of time the meeting adjourned and a tasty lunch was served and a pleasant social time followed.

## Seal Fund Short

Christmas Seal collections for this district are nearing the \$9,000 objective. It is reported by Donald King, chairman of the Medicine Hat Knights Club Christmas Seal committee, and Friday amounted to \$8,350.

Only \$650 short of the objective, the campaign should go to the top in another few days if everyone who intends to contribute would do so without delay. Mr. King said.

Alberta's provincial Seal sale fund is now only \$17,500 from the objective of \$18,000, which is the absolute minimum required to carry out the extensive anti-TB program of the Alberta Tuberculosis Association and its local district associations, according to G. S. Laskie, president of the Alberta Tuberculosis Association.

Yes, sir, that's Granville, the sweet old thing with the poisoned claws who turns up occasionally on the Rawhide Show. Of course she does look a bit like CBC staff announcer Max Ferguson but Rawhide, who says he's played with the re-embalance, claims this was just an optical illusion.

## Notes From B.V.C. High School

BY ALBIDA KILCUP

Year book staff 1951-52.  
Director—Kenneth Gordon.  
Editors—Elise Jones.  
Sub-editors—Inez MacDonald and Albida Kilcup.

Business manager—Dick Haskayne.  
Advertising manager—Dick Haskayne.

Art and photography—Margaret France.  
Editors—Philip Gibson, Hattie Berger and William Hong.

Biographies: Grade 12—Beverly Clark.  
Grade 11—Melvin Guttrich.  
Grade 10—Jenne Corbell.  
Grade 9—Bill Kuley.  
Features—Clark Slako.

Social editor—Adele Corbell.  
Sports editors—Duane Norton and May Hoff.  
Class historians—David Murray.

Valueditor—to be elected later by vote of the class.  
A meeting of the Students Union Executive was held on Wednesday, January 9th.

The topics discussed were the forthcoming social program, Students Union fee, year book staff and our recent subscription campaign.

The presentation of the Governor General's medal to Ida Schreier of Gleichen will be held in the Cluny Community Hall on January 25th at 2 p.m.

Allene Wilson was elected room representative for grade 12.

## United Church W. A. Meeling

A good attendance was present at the United Church Women's Association meeting held on January 9th at the Manse with Mrs. Morrison as hostess.

An interesting devotional period was conducted by Mrs. R. A. Wilson taken from the parable of the Good Samaritans.

The annual reports were read by the secretary, Mrs. Riddell, and the treasurer, Mrs. Hunter of organization which showed a commendable amount of work had been accomplished.

Miss Eberly read a thank you letter from the British and Foreign Bible Society for donation sent in and she would like to take this opportunity to say thank you to all who in anyway assisted her in this splendid work.

The same slate of officers will carry on for another year. They are as follows:

Hon. President—Mrs. W. Morrison.  
President—Mrs. W. Bollerger.  
Vice-President—Mrs. W. Pugh.  
Secretary—Mrs. N. A. Riddell.  
Treasurer—Mrs. K. Hunter.

Standing committees and program committees were appointed. A pleasant social hour followed.

## Salvation Army Chief, W. R. Dalziel, Here Next Week

Commissioner William R. Dalziel, Territorial Commander for Canada and Bermuda, will arrive in Gleichen on Wednesday night, January 23rd from Vancouver. While in Gleichen the Commissioner will be the guest of Senior-Major and Mrs. A. F. Parkin of Eventide Home, and will conduct an inspection of the Home and a meeting with the men and the staff on the morning of the 24th. As Mayor of Gleichen, Mr. H. Colpoys, will extend to the Commissioner greetings from the town. Mr. Colpoys will be supported by other representatives of the town and district.

From Gleichen Commissioner Dalziel will proceed to Calgary by car, where he is to be guest of honor at a banquet presented by the Advisory Board of the Salvation Army. E. W. Scorness will preside over the New Grace Hospital and Home, scheduled to be begun in the spring, will be discussed.

Commissioner Dalziel, with Mrs. Dalziel, has been in Salvation Army work for 48 years. The Commissioner served in Europe and Australia, and came to Canada from the United Kingdom where he was the Commanding Officer before receiving his present appointment last June. Commissioner and Mrs. Dalziel have two sons. Lieutenant Muriel is a Nursing Sister with the R.C.A.M.C. Two sons are doctors, one after spending several years in China is now in Toronto, and the other is a military doctor in Kingston, Ont.

## Bonsplend Underway

Gleichen curlers opened their annual bonsplend Monday morning with some thirty rinks entered. A number of rinks from the surrounding towns are playing. It will take all week to finish the games.

With the extremely cold weather the ice is in excellent condition and many splendid games are being played. The first bonsplend is put on a week earlier than usual. The members of the ladies curling club are by day and night serving hot lunches to players and visitors at the rink.

The entry list of rinks this year is down somewhat from last year. There were 43 rinks entered in 1951.

The curlers will hold their annual

## An Alarming Toll

THERE HAS BEEN INCREASING CONCERN in Canada in recent years over the number of accidents involving motor vehicles. Increases in population and in the number of cars and trucks on the roads no doubt account in part for the growing number of accidents, but there is strong feeling in many quarters that more interest should be shown in lowering the number of accidents which occur on our highways. During the last year, the number of Canadian service men killed, wounded and missing was 84,000. In the same period, at home in Canada, 170,000 persons were killed or injured in motor accidents on our highways.

### Many Causes Of Accidents

There are many causes of motor accidents. Faulty brakes, other mechanical defects, poor judgment on the part of drivers, excessive speeding and motorist driving all contribute to the annual toll of accidents. Some mishaps are unavoidable. Weather conditions sometimes produce hazards which even the most capable and careful drivers cannot avoid. Sometimes too, circumstances arise which make an accident unavoidable, although the drivers may not be at fault. However, there are many cases in which negligence in one or more respects is responsible for fatalities on the road and there is growing feeling that more effort should be made to eliminate accidents of this nature.

### Prairies Have Better Record

The number of accidents in Canada vary in different localities and are, of course, to some extent dependent upon such factors as the ratio of the number of cars to the population, the number of tourist cars on the roads and the density of population. There are fewer motor accidents in the prairie provinces than in other parts of Canada. In 1940, the last year for which figures are given in the Canada Year Book, 11,225 accidents which occurred in that year; there were 7,451 in Manitoba, 5,733 in Saskatchewan, and 8,700 in Alberta. These were less compared to the figures for Ontario where there were 27,400 accidents and Quebec where the total was 20,498. It is obvious that the difference is due in large part to the difference in population and in the number of cars in circulation. However, it is recognized also that the west has been very progressive in trying to reduce the number of accidents. Progress in conquering this serious threat to life and property is to be commended and it is to be hoped that the coming year will see a marked decrease in the number of highway accidents in Canada.

## Manitoba Has Made Big Strides In Industrial Way

### Colonization of New Areas in Province Were One of the Features

WINNIPEG—This year was one of outstanding achievement for a large and growing group of industries based on Manitoba's natural resources, Hon. S. C. McLeod, minister of mines and natural resources, said in his year-end review.

The industries produced new wealth, provided new employment, opened up new markets for other industries and, in certain instances, were primarily responsible for the colonization of new areas in the province.

The report noted: Mineral production in the past year is expected to total \$28,000,000, the same as last year. Forest production, valued at \$22,200,000, exceeded all previous records.

Hydro-electric power generated in 1951 amounted to slightly more than 2,270,000 kilowatt hours, an increase of 43 per cent over 1950.

Overall wild fur production jumped seven per cent, compared with the previous year, to a value of \$3,382.

Fish production during the winter 1950-51 and summer and fall seasons of this year was 35,600 pounds valued at \$7,264,230. This is an increase of 2,772,000 pounds and \$1,000,000 over the previous year.

## Patterns

Jiffy For Gifts

### Seek Big Farm Loan For Alberta

EDMONTON.—Henry G. Young, president of the Farmers' Union of Alberta, said that Alberta should be the first province to obtain a federal loan and bank loans involved in the federal emergency relief for farmers unable to harvest their crops. He said this would be more than \$60,000,000 under the maximum of \$200,000,000 in loans.

### MORE BABIES BORN IN MANITOBA DURING 1951

WINNIPEG.—More babies were born in Manitoba this year, but marriage and death tolls were down compared with 1950. E. S. MacIntyre, recorder of the provincial department of vital statistics, reported in Winnipeg. Births in the province during 1951 totalled 19,608, compared with 19,398 in 1950. There were 7,128 marriages against 7,262 a year ago and 6,554 deaths compared with 6,624.

### FIRST BREATH OF SPRING

A lovely lady we know always shares her hair with her friends. No—she doesn't give them away—but puts a huge bonnet of them on her entrance hall table and lets their fresh fragrance drift through the house. A lovely welcome and a breath of spring in the middle of this winter world!

Punctuation grew out of a system devised by Adam Smith, an Italian printer of the fifteenth century.

IT WAS GABRIEL'S HORNY HE HEARD—G. R. Hong, near what he thought was a busy boarder, near shore near San Francisco, Calif. He climbed on top of it, heard a queer roaring noise. Many experts identified it as a German fighting mine of World War II. It exploded 5,000 pounds of TNT. They exploded it, right! long after Mr. Hong had retired from his perch on top of the mine, where he believes he was as close to heaven as he ever likely to get. A severe knock would have exploded the bomb. Mr. Hong was told.—Central Press Canadian.

## Manitoba And Sask Lead Farm Income

OTTAWA—Canadian farmers got \$1,884,900,000 from the sale of their products in the first nine months of this year for 23 per cent gain over the same period of 1950.

The Bureau of Statistics said that cash income from farm products this year was up in all provinces, with the greatest increase in Saskatchewan and the largest absolute increase in Saskatchewan.

January to September income of Canadian farmers amounted to \$1,884,900,000 last year.

Supplementary payments to farmers this year under provisions of the Prairie Farm Products Administration amounted to \$10,100,000 against \$9,300,000 in 1950.

The Bureau of Statistics said that the increase in farm cash income was "largely the result of substantial increases in the prices of farm products during the first six months and higher average livestock prices for the entire period."

It reported that heavy spring grain marketing in 1951 was "markedly in excess of the income for the first six months of the year, were offset to a large extent by a substantial reduction in marketings of wheat, due to inclement weather, in the third quarter."

Ontario farm income led all others, amounting to \$598,446,000 as compared with \$504,710,000 last year. Quebec income was \$304,252,000 compared with \$288,107,000. Saskatchewan \$362,380,000 from \$243,881,000. Alberta \$258,822,000 from \$229,100,000. Manitoba \$108,322,000 from \$102,573,000. British Columbia \$74,334,000 from \$64,314,000. Nova Scotia \$31,812,000 from \$29,981,000. New Brunswick \$51,778,000 from \$30,776,000. Prince Edward Island \$17,700,000 from \$16,202,000.

### MORE THAN 71,000 TOURISTS VISITED MANITOBA IN 1951

WINNIPEG.—Hon. J. S. McLeod, minister of industry and commerce, said that with a record of more than 71,000 tourists estimated to have visited Manitoba during 1951, the province chalked up an increase in tourist trade greater than any other part of Canada.

The year-end review of the provincial department of industry and commerce showed that last year tourist figures for Manitoba was slightly more than 576,000.

## Funny and Otherwise

Bored Youngster (during performance by distinguished cellist): "Mummy, when the man's sawn right through that thing can we go home?"

Two women met on the street one day and they were exchanging back-handed compliments in the manner that is peculiar only to the female species of the world.

"Mrs. Brown," said one "did you know that you have on two different colored stockings?"

"I know, my dear," said the other, "and I can understand that it surprises you. But you must understand that it often happens to women who have more than one pair of stockings."

Mother (shrieking): "Why can't you be nice and quiet like Johnny? He isn't making a sound and you're jumping and screaming."

Shirley (Says): "That's your game, Mr. daddy coming to me late, and I'm you."

A woman entered a post office after 8 p.m. and wanted to send a telegram. The clerk told her that the delivery office was closed and that it could not be delivered. The woman, indignant, said it ought to be delivered as the post office was open.

"How near?" asked the clerk. "About five miles as the crow flies," the woman replied.

To which the clerk retorted: "I'm sorry, madam, but it is not delivery by crow after 8 p.m."

Mrs. Brown: Did you tell your little boy for insulting me? Mrs. Green: Yes, I did. I told him to stop acting like an idiot.

Visitor: Your painting attracts thousands of people studying with the best teachers in order to learn how to paint.

Artist: I'd like you to meet my cousin.

Visitor: Why? Is he an artist too?

Artist: No, he's a lawyer. He could get your money back.

Jones: I wish my wife were a dentist.

Bones: Why so?

Jones: I'd love to hear her say to me, "Open your mouth," instead of her usual, "Hust up!"

"You plead guilty to stealing the overcoat," said the magistrate. "Have you anything to say?"

"Yes, your worship," said the accused. "I had to have the sleeves shortened."

Jones: I heard that your wife came from a very large family.

Bones: Certainly, Nuts! She brought it with her.

"Did the school for sluttering cure you?"

"After supper picked a peak of pickled pepper!"

"That's wonderful."

"Yes, but I was a d-d-difficult to w-w-work into ordinary c-con-versation." 2067

## Estimate \$30,000,000 Will Be Spent In Search For Oil In Saskatchewan During 1952

REGINA.—An estimated \$30,000,000 will be spent in 1952 in the search for oil in Saskatchewan. Oil men said most of the money would go for oil drilling. Last year oil companies spent an estimated \$20,000,000 in the province. The expenditure in 1950 was \$10,000,000.

Seismograph work—involving surface exploration of underground formations—will continue at least the same tempo as this year and will likely increase.

Underground drilling will be accelerated throughout the province. The Williston basin is considered favorable for the finding of oil and finds have been made in it in North Dakota and Montana.

Several heavy crude discoveries were made during the year but the search for light oil was not fruitful. Heavy crude was discovered at Heart's Hill, 35 miles northwest of Kindersley, 20 miles southwest of Kindersley, and 20 miles north of Kindersley, which has been the most productive of Regina.

Natural gas discoveries have been made at Colville and Brock, 20 miles west of Regina.

Light oil in non-commercial quantities was found at Tompkins, 50 miles southwest of Swift Current, and Dahinda, 50 miles east of Regina.

## Alberta Indians To Be Convassed On Electoral System

Alberta Indians will be asked whether they wish to change their electoral system which make it possible for well-to-do young men to win chieftainships. G. H. Gooderham, regional supervisor of Indian affairs, said that the province's 50 Indian bands will be canvassed on the point within the next two months. Under the proposed changes a chief would be elected for a two-year term instead of for life as at present. In addition, women would be allowed to vote.

Several heavy crude discoveries were made during the year but the search for light oil was not fruitful. Heavy crude was discovered at Heart's Hill, 35 miles northwest of Kindersley, 20 miles southwest of Kindersley, and 20 miles north of Kindersley, which has been the most productive of Regina.

Natural gas discoveries have been made at Colville and Brock, 20 miles west of Regina.

Light oil in non-commercial quantities was found at Tompkins, 50 miles southwest of Swift Current, and Dahinda, 50 miles east of Regina.

Several heavy crude discoveries were made during the year but the search for light oil was not fruitful. Heavy crude was discovered at Heart's Hill, 35 miles northwest of Kindersley, 20 miles southwest of Kindersley, and 20 miles north of Kindersley, which has been the most productive of Regina.

## BY-LAW NO. 405

A bylaw of the Town of Gleichen regarding the clearance of snow from sidewalks.

Be it enacted and it is hereby enacted by the Council of the Town of Gleichen that all ratepayers or tenants owning or occupying property between Sixth Avenue and Third Avenue on Crowfoot Street, must clear off at least four feet in width the full length of the sidewalk fronting their property within forty-eight hours of the cessation of snowfall, failing which the sidewalk will be cleared by employees of the Town and the cost charged to the owner of the property on the Tax Roll.

This by-law shall come into effect immediately upon the passing thereof, and repeals all previous By-laws regarding the clearance of snow from sidewalks.

Read a first, second, and third time and finally passed in open council assembled this seventh day of January,

1951.

A. HORN,  
Secretary-Treasurer.

## Town &amp; District

Good will cutlers from Calgary spent a very interesting afternoon of curling and entertainment at the Gleichen Curling Club and home of Mr. and Mrs. T. Brown. Gleichen won four of the six games played but the fellows from Calgary had nothing but praise for the hospitality given them at Gleichen and hope to come back again this winter.

Last Friday the election for trustees for district No. three was held. Harry T. Colpoys was elected over F. Sammons. The former obtained 288 votes while the latter 200 votes. These figures are unofficial.

There was much interest in this

election and it is calculated that two-thirds of the voters turned out to exercise their privilege.

It. James joined Art Simpson's rink of Bassano and the team has left for Viking to enter the bonspiel there. The Viking club is offering \$100 for the main prize. The boys from this part of the world hope to bring these prizes home with them.

Patient: "Doctor, if there's anything wrong with me, don't frighten me half to death by giving me a long scientific name. Just tell me what it is in plain English!" Doctor: "Well, sir, to be frank you're just plain lazy." "Thank you, doctor. Now give me the scientific name for it so that I can tell my wife."

Young husband wired home from his new job: "Made foreman. Foster in my cap?" Five weeks later he wired: "Made manager. Another feather in my cap." After some weeks of silence he wired: "Fired. Send money for

train fare home." His wife unfeeling wired back: "Use feathers and fly home."

First lawyer: "You're a low down cheat." Second lawyer: "You are an unmitigated liar." Judge (rapping): "Now that the attorneys have identified each other, we'll proceed with the case."

Gleichen churches will hold their annual World's Day of Prayer on February 22nd. Everyone is welcome.

On January 23rd the Legion members are staging a one day bonspiel at the local curling rink. This spiel is open to all members and those who wish to enter this spiel are requested to hand in their names to Harvey Hoggie.

## CARD OF THANKS

May I extend my thanks to all, who helped with their time, their cars and their votes to win my re-election to the school board on Thursday last.

At your service,  
HARRY T. COLPOYS.

Dr. G. H. Farguherson was taken to a Calgary hospital last week suffering from an attack of pneumonia. Reports from the hospital is that he is doing well.

Total payments out of the Unaffiliated Judgement Fund from April to December 31, 1951 were \$18,775. E. R. Hoggie, Deputy Provincial Secretary states. Collections for the fund for which each operator of a motor vehicle in Alberta is assessed \$1 annually totalled \$242,931. A breakdown of payments from the fund showed that hospital and medical payments totalled \$25,731; judgements and costs, \$128,535; and miscellaneous \$44,070. The Unaffiliated Judgement Fund exists to compensate persons injured in accidents in which motor vehicles are involved and payments are made wherever a person found responsible by the courts for damage is unable to pay the amount of the judgement.

## MASTITIS IN DAIRY CATTLE

The control of disease is a major problem confronting every owner of livestock. The most common and costly disease of dairy cattle is mastitis or garget. Loss is due to decreased milk production, poor quality milk, and loss of animals either through death or having to sell infected animals for slaughter. The cost of treating infected cows is also high.

Mastitis is an inflammation of the udder. It is usually caused by a germ infection which enters the udder through the teat opening. Depending upon the type of germs which invade the udder, the acute or chronic type of disease occurs.

Acute mastitis is readily recognized because the udder becomes hot, swollen, and often caked the milk is clotted and bloody and the animal is noticeably sick. About ten per cent of mastitis cases are of this form.

Chronic mastitis is more difficult to detect and causes about ninety per cent of the mastitis. In this form the milk is usually abnormal but many cases are not detected and go untreated unless a laboratory method of diagnosis is used. In this type of infection there is little evidence of disease, but these animals are a source of infection. Unless these infected quarters are treated they become non-functional as the milk secreting tissue of the udder is destroyed. Chronic mastitis may be detected by using the strip cup, indicator blotter, and by laboratory examination of the milk.

Anything which causes injury to the teats or udder makes it easier for the infection to invade the milk tissue. The most common causes are: Damage to teats or udders from wire cuts, hip's door, silks, stones, stumps, etc.; Improper use of milking machines; allowing cows to lie on cold cement floors, ground, or stand in draughts; narrow stalls which allow cows to tramp on each others teats; poor sanitation.

Infected cows should be treated as soon as they have been discovered. The proper treatment for mastitis cows is best determined by consulting a veterinarian. The new drug known as aureomycin has given good results in the dairy herd at the Experimental Station, Lethbridge.

The important thing to remember is that prevention is better than cure. To eliminate and maintain a mastitis free herd the following practices are recommended: Prevent infection to udder; use correct milking methods; wash cloths and teat cups should be dipped in an antiseptic solution between cows as mastitis can be transferred from one to another; milk infected cows last; do not buy infected cows; do not feed infected milk to heifer calves if they are allowed to suckle one another as their udders may become infected.

## CANADIANS WANTED

FOR CANADA'S INFANTRY BATTALIONS  
If you are a young man of high mental and physical fitness there is a fine opportunity for you to become a regular soldier, and serve Canada at home and abroad.

**"What's new?"**

AS HE PULLS UP at the end of his day's run, it's just his friendly way of saying "hello". But if there is some important development in town, he expects his friend the bank manager will know about it: ... plans for enlarging the school ... the chance of a new factory opening up ...

It's part of the bank man's job to know his community. His customers expect him to know "what's new" in other parts of Canada and elsewhere, too ... business facts, leads to new markets at home and abroad for farm as well as factory.

You will find your bank manager well posted, and ready to serve you. Chartered banks work that way.

One of a series  
by your bank
